DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

The claimed invention is directed to a method for setting an RF channel in a VCR system connected to a TV. The independent claim identifies the feature of "(c) searching for the target RF channel by selecting a current RF channel from RF channels available for the VCR system; (d) loading a VCR message signal to be displayed on a screen of the TV on a carrier wave frequency corresponding to the current RF channel; (e) requesting a user to confirm that the current RF channel is set as the target RF channel; (f) if the user has not confirmed that the current RF channel is set as the target RF channel, returning to step (c); and (g) setting the current RF channel as the target RF channel". The closest prior art, Kakiuchi et al is directed to a conventional RF output channel setting device, either singularly or in combination fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Mankovitz discloses an apparatus for deriving a television guide from audio signals.

Arad et al discloses an apparatus for determining channel to which a TV or VCR is tuned.

Macrae et al discloses a system for controlling the broadcast and recording of television programs and for distributing information to be displayed on a television screen.

Kakiuchi et al is directed to a conventional RF output channel setting device.
